

# CHALLENGES AND OPPORTUNITIES FOR AGRICULTURAL NITROGEN SCIENCE IN INDIA

3-5 October, 2017, New Delhi

## Conference and Workshop of the India-UK Virtual Joint Centres:

**SPEAKERS ARE INVITED**  
on the topics:

**Registration:**  
<http://news-india-uk.international/vjcmeeting>

**Agronomical  
nitrogen use efficiency**

**Biological  
nitrogen use efficiency**

**Biological  
nitrogen fixation**

**Looking forward to meeting you,**  
Mark Sutton, Andrea Moring, Alison Bentley,  
Arti Bhatia and N. Raghuram  
Organisers

**The event is sponsored by:**

### Goals of the Workshop

- To introduce the VJCs and project partners to each other to build a stronger shared community on nitrogen research between UK and India.
- To share initial findings of the VJCs and to stimulate the agenda for cooperation in the next 2-5 years.
- To share practical lessons learned as a basis to improve the VJC model.
- To develop the long-term vision for nitrogen research and its policy application in India. An outcome will be a vision statement that can contribute to build the next phase of India-UK cooperation on nitrogen.
- To provide a mechanism by which India-UK science cooperation can feed into the developing science synthesis of the Indian and South Asian Nitrogen Assessment processes.
- To produce an outcome paper that summarizes the vision and priorities for future work on agricultural nitrogen for India.
